East R/C Upgrade Aluminum Roller Button for Spektrum DX3s Transmitters

Instructions for installation:

1. Remove the rubber grips.
2. Gently loosen all Spektrum labels to access the screws underneath.
3. Use a #1 Phillips screwdriver to remove all screws from Radio Case.
4. Loosen one side of the clear cover on the display screen. It is attached with a light adhesive. This will allow the radio to separate completely.
5. Install the East R/C Upgrade Aluminum Scroll Button into the menu PCB. Be sure to gently push the wheel into the position with the hex pin to the right.

6. Lift up on the loosened plastic screen cover and reassemble the radio.
7. Be sure to line up the case properly and do not pinch the power wires by the battery compartment.
8. Re-install the rubber handgrips and re-attach the labels.
9. Get ready to bash or race your favorite R/C vehicle with the your newly upgraded Spektrum DX3s!

When working on your transmitter or any sensitive electronics, keep your work area clean and dry. Always use tools that fit properly and don't over tighten any screws. Over tightening screws inside a transmitter can break the mounting posts and PCB boards. East R/C will not be held liable for damages to your transmitter.
